TOGAF® Poster Series #7
Capabilities and Projects
by Roger Evernden

Good e-Learning

Illustrated below, you will find the following:

» **Enterprises** - usually organized vertically by function

» **Capabilities** - combinations of organization, people, processes, and technology that cut across functions and are critical for the success of the enterprise

» **Dimensions** - each capability dimension must be improved in parallel
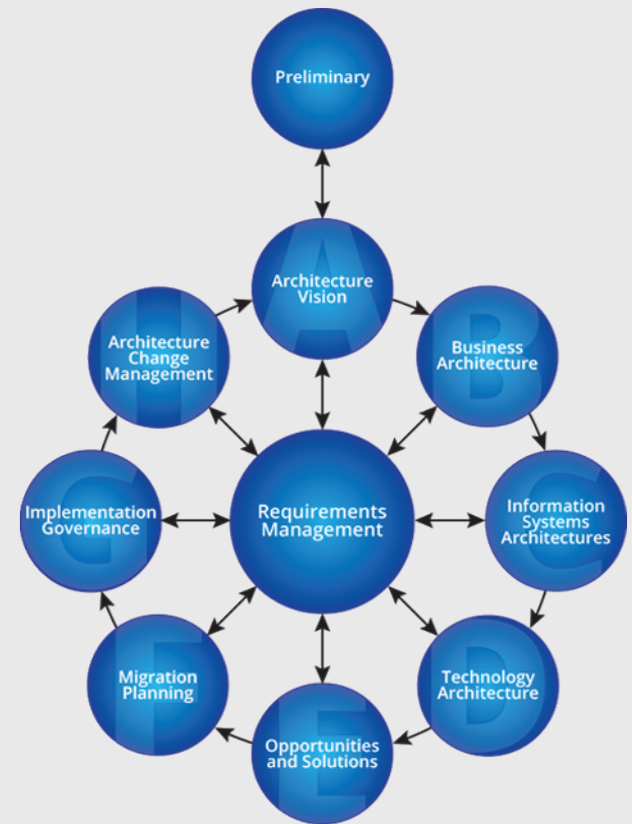

(a quick reminder of the ADM processes)

ENTERPRISES	CAPABILITIES	DIMENSIONS

Line-of-Business Functions e.g. Banking, Retail

Corporate Strategic Plan – Phase A: Architecture Vision

Business Transformation	Goals and Objectives

Corporate Investment in Projects & Programs

Corporate Functions e.g. HR, Finance, Legal

Capability – Outcome Oriented – Phases B, C & D: Architecture Definition

Electronic Service Delivery	Sarbanes-Oxley Compliance

Projects are established to improve capabilities

IT Functions e.g. Development, Services

Capability Increment – Phases E & F: Transition Architectures

People Dimension e.g. Training or professional development	Process Dimension e.g. Business process or information management	Material Dimension e.g. Infrastructure, information technology, or equipment

Architecture & Solution Building Blocks – Deliverables

Projects are divided into incremental steps

Solutions incrementally deliver capability
